EASA COURSE PROGRAM

WE BUILD

EXPERIENCES

Flying Academy's mission is to make YOU the most professional, skilled and dedicated pilot. We are completely equipped for the challenges of employment opportunities of airlines all over the world.

Our mission is a commitment to our students based on personal approach and care, guide them step by step, close monitoring, and adapting the training.

This is our promise!

OUR STORY

... SO FAR

Perfect safety record,
unprecedented student support,
and best in class training environment is our promise.

International TRAINING

We are Flying Academy - International Flight Training center with more than three decades of experience, founded by airline pilots for future airline pilots.

Perfect SAFETY

The regulation in the European Union is very strict about aviation safety. Our fleet is maintained at the highest levels of safety. Flying Academy prioritizes and promotes safety culture in all aspects of its operations.

Our FLEET

Flying Academy, one of the leading global flight schools, is proud to present our fleet. It consists of single and multi-engine aircraft. The whole fleet, at both continents where we operate, consists of over 42 aircraft.

Online TRAINING

With Flying Academy's brand new online classrooms, you can start your theoretical training without leaving the comfort of your home, in a decent amount of time!

EASA 0-1500

WHAT IS 0-1500?

The Zero to 1500 hours course is designed for future pilots with no current flight experience. The training starts from PPL(A) to CPL(A) and continues the IR(A), MEP, and Flight Instructor ratings. You will have additionally 1300 hours of experience within 2 years of working as a Flight Instructor (Pilot-in-Command time) with Flying Academy, reaching 1500 hours total time, which is not only a crucial milestone for all airlines but also a turning point for each pilot's personal flight experience.

Upon completion of the 0-1500 course, you will achieve the Airline Transport Pilot License that comes with a great deal of responsibility, complex decision-making, and the ability to understand and cope with abnormal situations. After this course, your ATPL will be unfrozen and you will be qualified to work in the airline industry

ACADEMY**

COURSE BENEFITS

SAVE YOUR TIME WITH ONLINE CLASSES

You will begin all of your theoretical training from the comfort of your home. Afterwards, you shall come to the school to carry out the flight training portion of your course.

BEGIN YOUR JOURNEY IN AVIATION

You can start with our discovery flight or directly enroll in our Private Pilot License course which is the first step into the world of aviation. Become a Pilot from zero experience with our 0-1500 course and continue your journey in aviation as a professional pilot.

SAVE YOUR VALUABLE FUNDS

This organisation of training will decrease the costs of the training, providing you with high-quality theoretical training following the current trends, while allowing you to save on the living costs.

WHAT'S INCLUDED

You will have up to 750 hours of online theoretical training, which consists of:

- Lecture presentations conducted by appointed instructors
- In-depth consultations held
- Seminars and Long Briefings to incorporate your practical and theoretical training
- Stimulating assignments via Google Classroom
- Progress check monitored by your student advisor
- Temporary access to all class recordings
- Access to your eLearning (LMS) portal where you will find all interactive study material.
- Possibility of doing your exams at school or any approved Civil Aviation Authority Center.

WHAT ARE THE **ADVANTAGES**

- Our virtual classroom is set up with the latest technological advancements to ensure a prime level of learning.
- Students can attend lectures, go through the reading materials, complete assignments, and fulfill their theoretical requirements.
- No geographic restrictions
- Students can save tremendous time and funds on their overall pilot training!
- Courses are broadcasted LIVE so that students may voice questions and enable optimum interactivity
- At the end of each “class”, students have the opportunity to partake in guided discussions to clarify any misunderstandings they might have concerning the lecture.

COURSE ENTRY

REQUIREMENTS

**TO BE AT LEAST
18 YEARS OLD**

**TO BE AT LEAST CLASS
1 MEDICAL HOLDER**

**TO PASS OUR INITIAL
ASSESSMENT**

**TO HAVE SUFFICIENT
KNOWLEDGE OF
MATHEMATICS & PHYSICS**

**PROFICIENCY IN THE
ENGLISH LANGUAGE**

THEORETICAL TRAINING

The trainee will complete theoretical courses for PPL(A), IR(A), MEP(A), ATPL theory & FI(A). For the FI rating, the trainee will undergo dedicated preparation to meet the standards of quality of Flying Academy for Certified Flight Instructors.

The course covers all 14 subjects of the PPL syllabus. The applicant has to go through ground training covering:

- Air Law
- Principles of Flight
- Mass and Balance
- Flight Performance
- Communication
- IFR and VFR
- Airframes and Systems
- Instrumentation
- Radio Navigation
- General Navigation
- Meteorology
- Human Performance
- Flight Planning
- Operational Procedures

PRACTICAL TRAINING

Flight training will start with the PPL(A) and Night Rating, continue with IR(A), MEP(A), CPL(A), and finally FI(A).

At the end of the training plus 2 years of employment, the trainee will have a minimum of 1500 total flight hours (including PPL(A) time):

- 1400 hours as Pilot-in-Command
- 100 hours of Dual hours (training received)

PRACTICAL **EXAMINATION**

The practical skill exams in the airplane with the examiner can be taken after successful completion of the written tests.

For the 0-1500 hours, there are 6 practical examinations: PPL(A), IR(A), MEP(A) & MEP(A) IR, CPL(A), and FI(A)

The applicant must demonstrate the ability to:

- Operate the airplane within its limitations
- Complete all maneuvers as smooth and as accurate as requested by EASA
- Exercise good judgment and airmanship
- Apply aeronautical knowledge
- Apply the emergency procedures and maintain safe operations
- Maintain control of the airplane at all times

THEORETICAL EXAMINATION

PPL - For PPL(A) the applicant has to demonstrate the theoretical knowledge at the CAA office in the form of written tests. Tests consist of nine subjects (Meteorology, Navigation, Communications, Aircraft General Knowledge, Principles of flight, Air Law, Flight performance and planning, Human Performance and limitations, Operational procedures).

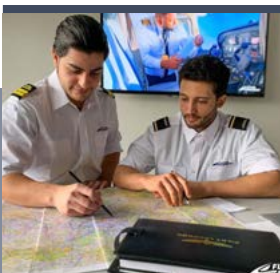

ATPL Exam - For ATPL(A) – An applicant must demonstrate a level of knowledge appropriate to the privileges of the holder of ATPL(A) in accordance with EASA requirements of Part-FCL.

TRAINING LOCATIONS

OUR LOCATIONS

With our international community, we also have our training locations spread across the globe. We have four bases in the heart of Europe. For this course you can join us in following bases.

PRAGUE CZECH REPUBLIC

The Czech Republic is the perfect location for both practical and theoretical training. Flying Academy is the first choice of pilot training for future Professional or Private Pilots from all continents.

VIENNA - BAD VÖSLAU AUSTRIA

Vienna, Austria is the perfect location for your professional pilot training. With new modern equipment, exclusive studios and technology, combined with our highly trained and experienced instructors.

BRNO WEST FALCON FIELD CZECH REPUBLIC

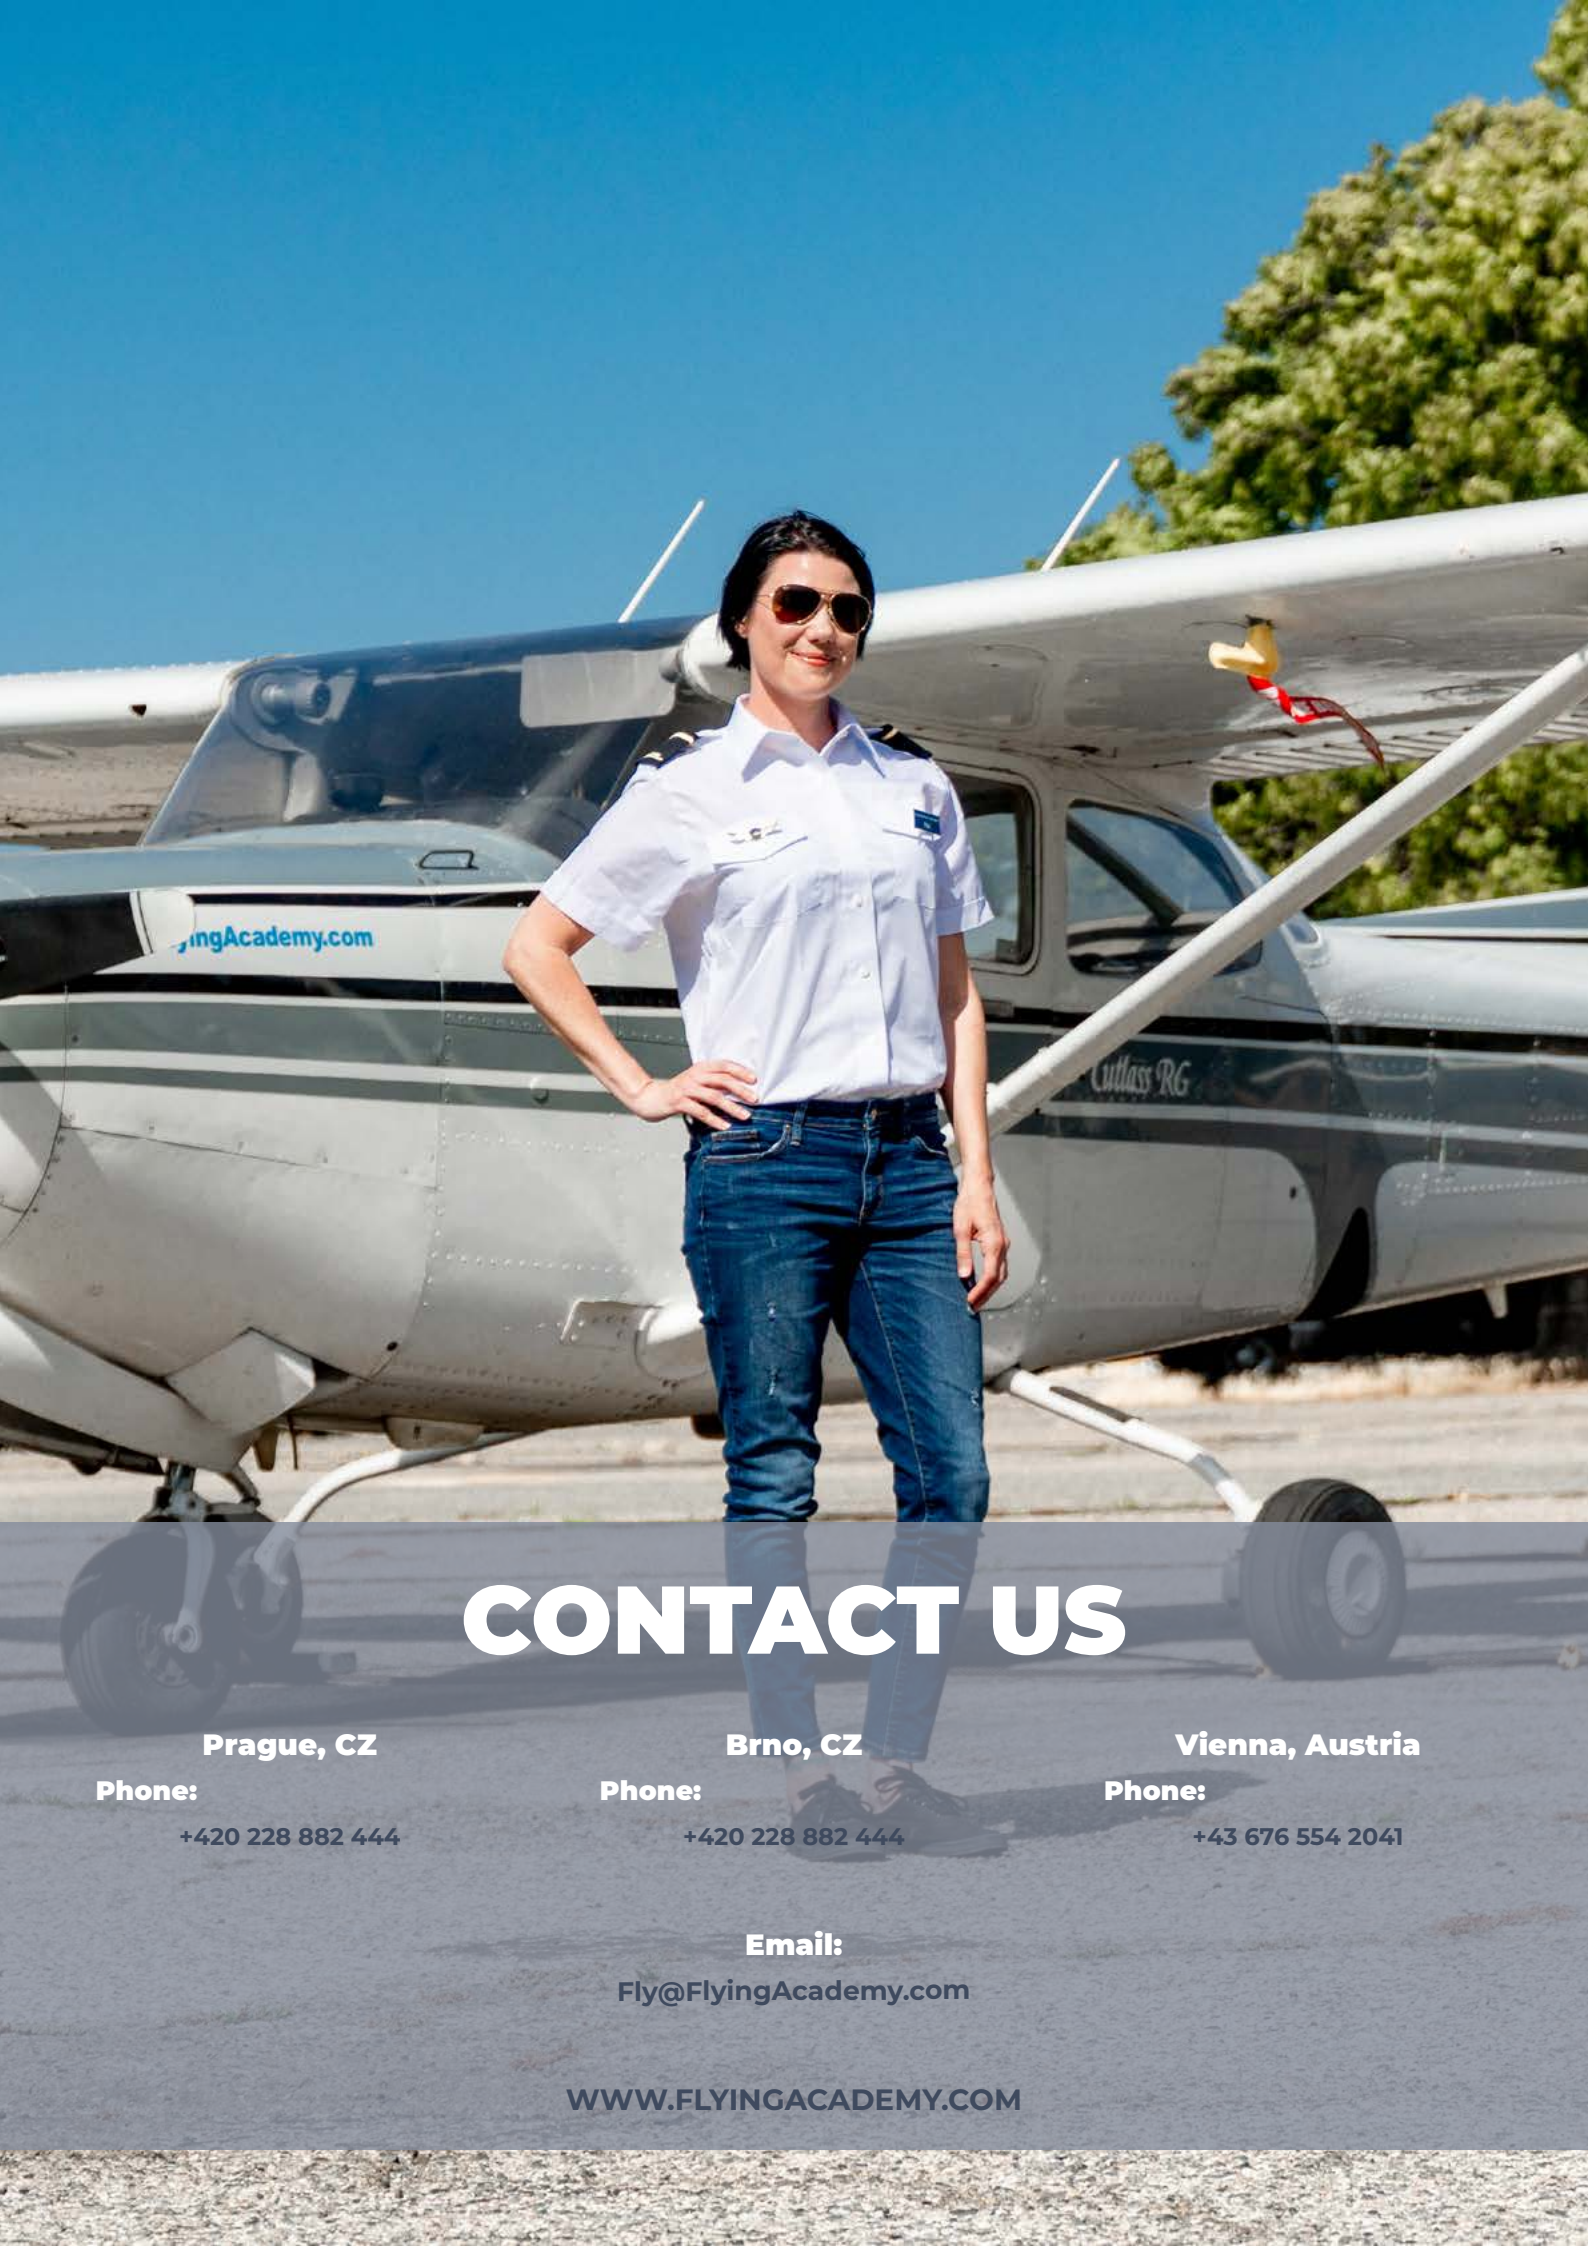

Located in the heart of Europe, the Brno Falcon Field allows students to explore all different regions of Europe from the cockpit by being in the middle ground between Eastern & Western Europe

BRNO TUŘANY CZECH REPUBLIC

Flying Academy is located at Brno Tuřany International Airport (LKTB). Use an opportunity to travel Europe as a part of your flight training, in a multinational airport.
